300" HIGH SPEED PAPER MACHINE

DOMINION ENGINEERING 41C-00 HARRICANA left hand drive, high speed, groundwood specialty paper and newsprint machine with up to 3500 FPM normal operating speed, 4000 FPM max balance speed, 464 TPD @ 3250 FPM rated normal operating capacity, 637 TPD @ 3850 FPM max theoretical capacity, 48.8 GSM basis weight, 326" wire width, 304" reel trim, 300" winder trim, s/n 00002-278 41C-00. Partial listing of assets include:

DOMINION ENGINEERING DYNAPLO hydraulic headbox with 318" slice width, 4000 FPM design speed, rectangular retractable header with 28" diameter inlet and 10" diameter outlet, slice, showers and instrumentation, s/n 41C-01

DOMINION ENGINEERING PAPIRFORMER TWIN WIRE FORMER with 326" wire width, 68' wire length, 4000 FPM design speed, 36.75" diameter x 330" face breast roll, 48" diameter forming roll, (9) 330" face wire rolls, automatic wire guide, oscillating showers, power actuated reversible tail cutter, stainless steel save-alls, s/n 41C-02

DOMINION ENGINEERING 48" diameter x 322" face couch roll with two compartment stainless steel suction box, s/n 41C-03

DOMINION ENGINEERING 1ST DRYER section with (1) 42" diameter x 321" face BABY steam dryer with 75 PSIG design pressure, 11"x15" front head mounted manhole cover, rear steam supply, front condensate removal; (8) 72" diameter x 321" face steam dryers with 75 PSIG design pressure, 11"x15" front head mounted manhole cover, rear steam supply, front condensate removal; (7) 24" felt rolls; (1) felt stretcher; short draw design; ROSS steam hood; s/n 41G-08

DOMINION ENGINEERING 2ND DRYER section with (8) 72" diameter x 321" face steam dryers with 75 PSIG design pressure, 11"x15" front head mounted manhole cover, rear steam supply, front condensate removal; (7) 24" felt rolls; (1) felt stretcher; ROSS steam hood; s/n 41G-03

LAMB 21E8E-5 PAPER ROLL HANDLING AND PACKAGING SYSTEM

FINISHING & PACKAGING SYSTEM

LAMB 21E8E-5 paper roll handling and packaging system with 28"-50" roll diameter handling capacity, 28"-96" roll length handling capacity, max 105 rolls/hour design capacity, consisting of: roll transfer system with conveyor and lowering unit; pallet loading and handling system; arm lifter and roll placing system; weigh station; wrapping station; strapping station; labeling system; out-feed and exit conveyor; control consoles and machine integration; s/n n/a

THERMO-MECHANICAL PULPING TMP REFINERS

CENTRIFUGAL VACUUM PUMPS

HYMAC-JYLHA (REBUILT – ANDRITZ 2015) HSD 6056/54 TMP plate type thermo-mechanical pulping refiner with 53.93” disc diameter, speeds to 1800 RPM, 8,500 HP rating, pressurized steam separator, ribbon screw feeder, electro-mechanical plate positioning, instrumentation, vibration monitor, plate protection system, s/n 5354 (26B-38)

HYMAC-JYLHA (REBUILT – ANDRITZ 2014) HSD 6056 TMP plate type thermo-mechanical pulping refiner with 53.93” disc diameter, speeds to 1800 RPM, 8,500 HP rating, pressurized steam separator, ribbon screw feeder, electro-mechanical plate positioning, instrumentation, vibration monitor, plate protection system, s/n 5351 (26E-03)

NASH CL9002G liquid ring single stage vacuum pump with 11,250 CFM @ 277 rpm rated capacity, NASH integrated gear drive with 450 hp @ 1800 rpm rated input, s/n MCO01937 (41-Q04)

NASH CL9002G liquid ring single stage vacuum pump with 11,250 CFM @ 277 rpm rated capacity, NASH integrated gear drive with 450 hp @ 1800 rpm rated input, s/n MCO0601 (41-Q05)

NASH CL9002G liquid ring single stage vacuum pump with 11,250 CFM @ 277 rpm rated capacity, NASH integrated gear drive with 450 hp @ 1800 rpm rated input, s/n 81C0057 (41-Q06)
